Comcast SSL Setting for Outlook E-Mail

At one point Comcast may require you to change to an SSL (Secure Socket Layer) in order to successfully receive your e-mail.

Below are the directions to perform this task:

- 1) PRINT OUT THESE TWO PAGE DIRECTIONS
- 2) Start Outlook
- 3) Single click on **TOOLS**
- 4) Single click on ACCOUNT SETTING or E-MAIL
- 5) Single click on **mail.comcast.net** in the white box
- 6) Single click on **CHANGE**
- 7) You will now see your login information. Single click on the **MORE SETTING** button on the lower right hand side of the Window.
- 8) Single click on the **ADVANCED** tab.

You will make to change the setting on the ADVANCE screen so that they look like the below example.

😡 Calendar - Microsoft Out	look		_ = ×

The Incoming server (POP3) is now changed to 995 from the original value of 110.

The box that says **This server requires an encrypted connection (SSL)** is now checked.

The Outgoing server (SMTP): is now changed to 587 from the original value of 25.

The **Use the following type of encrypted connection:** Choose **TSL** from the dropdown list. The original value was **none**.

Under **Delivery** the **Leave a copy of this message on the server** should remain unchecked

Single Click OK

Big X out of all other Windows until you get back to the Outlook Window.

You have now setup up your e-mail for Comcast's SSL Settings.
